ANKARA UNIVERSITY

COM101B

Fall 2017

LAB4-Quiz

Date: 17/11/2017 Group 2

Duration: 60 minutes

Write a program that takes a character sequence and <u>a number (\mathbf{k})</u> and rotates the character space from right to left <u>k times</u>.

For example: Assume that the input is:

>abcdef 2

Your program will print

>cdefab

Ex 2:

- > abcdefghijklmn 5
- > fghijklmnabcde

Input Format:

<character sequence without space>[space]<number>

Ouput format:

<rotated character sequence without space>\n

*You can assume that the character sequence will not exceed 50 characters.

Submission: Your source code will be named using your student ID: <student-id>.c

Ex: if your id is 1123456 than you should name your source code like this: 1123456.c

Please test your program thoroughly before submission.

Good luck [©]
